**7-Year Limited Warranty Factory Warranty
on all Signature Series Valves**

Hard water can cause a variety of problems in your home, from leaving unsightly spots on dishes and fixtures to clogging your drains. This is due to a high concentration of dissolved calcium and magnesium, which are the minerals responsible for hard water.

These minerals can also create soap scum, and they can significantly reduce the lifespan of appliances like dishwashers and washing machines. In fact, hard water can make your water heater work 20-30% harder, and you may need to use up to three or four times more soap and detergent for cleaning and laundry.
